

MAT-OHT-0554 Patient Testimonial Video_David

0:24

I'm David, I'm 69 years old.

0:26

I live in California with my lovely wife.

0:29

I have 3 girls and I have 12 grandchildren and four great grandchildren.

0:36

In my free time I love to do golfing, bowling and just spending time with my wife.

0:43

That's the best part of my life.

0:45

When I was younger I smoked for a few years, which I know wasn't good and most of the jobs I worked at the air quality and the environment was not good at all.

0:54

And then as I got older I found it started getting harder and harder to breathe.

0:58

So I went and had my lungs checked out and that's when I found out I had COPD.

1:04

My chest gets tight and it just feels like my lungs shrink and you can't get enough air inside your lungs to where you could take a really deep breath.

1:12

When one of my grandsons was about four years old and playing ball, throwing it back and forth, he just got kind of really discouraged because I got to the point where I couldn't even throw the ball back to him anymore.

1:25

I basically couldn't do nothing.

1:29

It just got to the point where everything was hard to do.

1:32

Getting the confirmation of what it is and knowing how to go forward with it was the best part.

1:39

What can we do from now?

1:41

I went for an appointment to my pulmonologist and she did our checkup and everything.

1:46

And then she said there was the drug for COPD.

1:49

It was called Ohtuvayre, and she said I'd like you to try it.

1:52

So she wrote out a prescription for me.

1:54

She contacted the manufacturer and then it started being sent to my house.

1:59

They put it right at the door.

2:00

I don't even have to go to the mailbox.

2:02

In my experience, when I added Ohtuvayre to my regiment that I was doing, it made an amazing difference to where I was able to do so much more.

2:12

It's not perfect, but I'm able to go back and do things that I wasn't able to do.

2:17

It's extended the time that I'm able to do something for a longer period of time.

2:21

I love him a lot.

2:23

He's my world.

2:25

Before Ohtuvayre, it was hard.

2:28

It's hard to see him just struggling, just picking up a chair in the living room and carrying it across the room.

2:34

He would be out of breath and after Ohtuvayre, I'm not worried about him all the time.

2:40

He's breathing a lot better now.

2:43

I noticed when he started taking Ohtuvayre, we could walk further.

2:47

When we go down towards the ocean, I'm able to walk the whole pier.

2:51

The piece for me is knowing that David can breathe easier and enjoy life.

2:58

I really didn't expect Ohtuvayre to do what it does.

3:02

It was just wow, something feels different.

3:07

When I got started on Ohtuvayre, I really didn't understand how it was going to be paid for because I know with a lot of medications, insurance doesn't want to cover anything.

3:16

Verona took care of everything.

3:18

They made it so easy for me to understand the cost for this.

3:21

The Verona Pathway Plus experience has been incredible.

3:24

There are super people to deal with, and if you ever have a problem, just give them a call.

3:29

The pharmacy calls me every month and if everything's all set, I get the refill in two to five days.

3:35

Adding Ohtuvayre to my maintenance therapy has made a big difference.

3:39

I get up in the morning, I put the coffee on, and by the time the coffee's done brewing, I'm done with my Ohtuvayre treatment.

3:46

They say twice a day, so I figure 12 hours around 6:00 PM, we'll be watching TV.

3:51

I'll just grab my nebulizer and do my treatment.

3:53

I don't think it could be easier than that.

3:55

I'm very grateful for Ohtuvayre.

3:58

This is a book full of all our memories.

4:00

Such a wonderful life I've had with you.

4:02

I really love you and enjoyed being with you and all the times we spent together and hopefully so many more.

4:09

In all actuality, I feel lucky in my life.

4:12

If you have breathing problems, make sure you talk to your physician about Ohtuvayre.

4:17

I've gotten an amazing experience from.

4:20

Hope other people can too.

4:26

Indication and Important Safety information. Indication Ohtuvayre is a prescription medicine used to treat chronic obstructive pulmonary disease COPD in adults.

4:41
